

Christmas Bauble

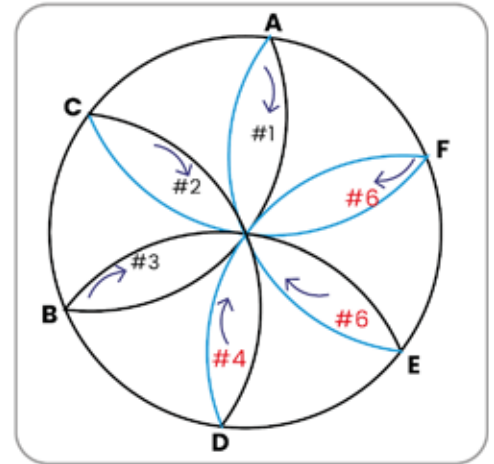

Follow the instructions to draw a Christmas bauble.
Make a small hole with a needle to pass the thread through if you want to hang it up! (Ask an adult for help)

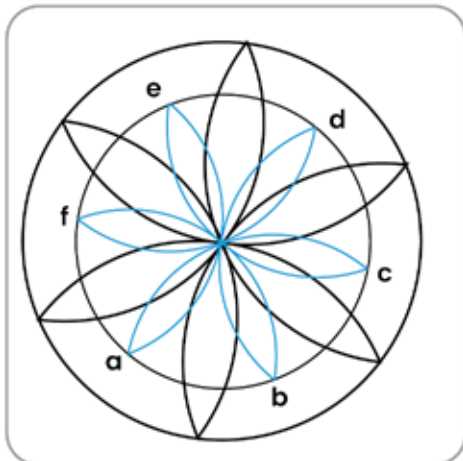

1. Draw a circle with a compass.
2. Keep the radius of the compass the same as the circle and place the compass point on the circle. Draw a line from the left side of the circle to the right. (Curve 1 is point A to point B)

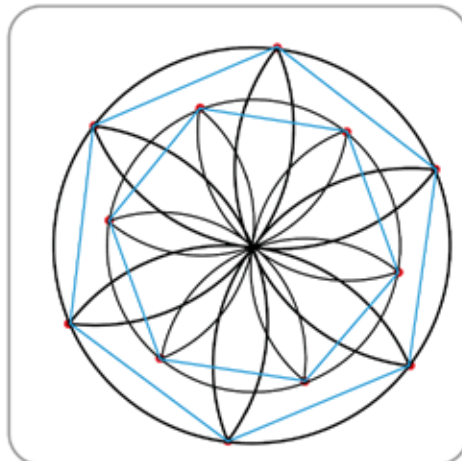

3. Set the compass point where the curve #1 touches the circle (B).
4. Draw curve #2 from C to D.
5. Set the compass point where curve #2 touches the circle (D).
6. Draw curve #3 from B to F

7. Set the compass point to E.
8. Draw curve #4 from D to F.
9. Set the compass point to F.
10. Draw curve #5 from E to A.
11. Set the compass point to A.
12. Draw curve #6 from F to C

13. Make a smaller circle.
14. Keep the same radius. Place the compass point (a) on the smaller circle and between the points of the larger design. Make the same design as on the larger circle.

15. Use a ruler to make straight lines from point to point.
16. They may color in the design.

Use colored pencils or skinny markers. Limit to 2 or 3 colors. Repeat colors to form a pattern.
