# Lost in the forest

Santa got lost in the forest! Help him find his way back to his workshop.

Think of the path he must take to cross the forest to the red flag.

Draw the arrows you need to give him instructions in the blue box. One arrow per grey square.

How many times will he have to repeat these instructions to reach the red flag?

An idea from concours.castor-informatique.fr

Repeat _ times

If you repeat 0 time, then the instruction is given once.
