

# Programming

An idea from [concours.castor-informatique.fr](http://concours.castor-informatique.fr)

A lazy but clever elf wants to program his robot to take a nap while the robot waters his plants.

Help him by correctly ordering the different commands.

## COMMANDS

- 3 Move 8 spaces to the left
- 2 Grab the watering can
- 1 Move 5 spaces to the right
- 5 Wait 3 seconds
- 6 Turn off the tap
- 8 Pour out the contents of the watering can
- 7 Move 5 spaces to the right
- 4 Open the tap
