

Containers

The elves are preparing their special and very secret New Year's Eve cookies.

They are measuring the dough.

10 spoonfuls fill one cup; 4 cups fill one jug;
2 jugs fill one pot.

$$10 \text{ spoonfuls} = 1 \text{ cup}$$

$$4 \text{ cups} = 1 \text{ jug}$$

$$2 \text{ jugs} = 1 \text{ pot}$$

How many spoonfuls do you need to fill one pot?
